DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-49 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4192113 to Martin, Jr.

Reference to Martin, Jr. discloses an exterior trim piece comprising a sheet of deformable metal material with flat and curved surfaces (as best shown in Figure 5), wherein edges of the exterior trim are retained on mating support structure (32 and 44, Figure 6) with a hooked edge configuration and including a bolster (76, Figure 5) filling the interior of the trim product. Applicant's bolster is broadly claimed to comprise either sheet metal or molded material, and both variants, the sheet metal (44) and the foamed plastic (76) are disclosed by Martin, Jr. A fastening means (66) mounts the bolster to the surface while remaining hidden from view.

Regarding claims 32 and 33, whether the supportive building member serves as a soffit or roof sheathing does not bear upon the structural limitations of the trim product, as the soffit and roof sheathing are not positively claimed.

Relevant Prior Art

US Patents 5694726 to Wu and 4848045 to Nichols et al. disclose architectural trim pieces whose edges hook and engage underlying supportive bolsters. Fasteners are hidden from view.
